

## ACCURACY

"Yes, Henry, I've traveled into every corner of the globe."  
"The globe is a spherical body, uncle. Therefore it has no corners!"  
—Chips.

### Doing Out Knowledge.

Mrs. Chugwater—Josiah, what is the origin of the name Milwaukee and what does it mean?

Mr. Chugwater—It comes from the Latin word mille, meaning a thousand, and Wau Kee, a Chinaman; Milwaukee, a thousand Chinaman. Think you can remember that?

### Severe.

"I don't think there is an honest hair in his head."  
"That's right. I believe he'd ever cheat at checkers!"

### Worth Its Weight in Gold.

PETIT'S EYE SALVE strengthens old eyes, tonic for eye strain, weak and watery eyes. Druggists or Howard Bros., Buffalo, N. Y.

The man who forgets that he was once a boy is almost as scarce as the woman who denies that she is still a girl.

Dr. Pierce's Pleasant Pellets regulate and invigorate stomach, liver and bowels. Sugar-coated, tiny, granules, easy to take. Do not gripe.

The noblest motive is the public good.—Virgil.

## The Farmer's Son's Great Opportunity

Why wait for the old farm to become your laboratory? Begin now to prepare for your future. Secure a steady income and independence. Great opportunity awaits you in Manitoba, Saskatchewan or Alberta, where you can secure a free home-land or buy land at reasonable prices.

**Now's the Time**

—Not a year from now when land will be high. The profits secured from the abundant crops of wheat, oats and barley, as well as cattle raising, are causing a steady advance in price. Government returns show that the number of settlers in Western Canada from the U. S. was 60 per cent larger in 1910 than the previous year.

Many farmers have paid for their land out of the proceeds of one crop. Free homesteads of 160 acres and pre-emption of 160 acres at \$3.00 an acre. Fine climate, good schools, excellent railway facilities, low freight rates; wood, water and lumber easily obtained.

For pamphlet "Last Best West," particulars as to suitable location and low settlers' rates, apply to Sup't of Immigration, Ottawa, Can., or to Canadian Gov't Agent.

## NOTES FROM MEADOWBROOK FARM

By William Pitt

After the lambs are a few days old they begin to look around for something to eat, and they should be given an opportunity to go out in search of food, by making creeks which they can go out and in as they please and have access to such foods as oats and bran with some of the finest and most tender hay that the farm affords; nothing is too good for the little fellows.

The grape needs nitrogen for growth of vine and potash and phosphates for the perfection of its fruit. Bone dust worked into the soil about roots after growth is established supplies phosphates and one-half a bushel of unleached wood ashes to a vine applied in the spring gives the necessary potash.

Water or moisture is always on the move. When it rains it soaks the ground, and as soon as it stops raining it starts its upward movement by capillary attraction. It travels from one soil particle to the next, and so on until the soil becomes what we call dry.

Now is a very good time to save out the best pullets to take the place of the discarded hens this fall. It pays to keep the best stock in order to get good results, and this can be done in no other way any better than by constantly culling and picking.

Don't fail to give the fall pigs plenty of slop consisting of skimmed milk mixed with some kind of a ground grain. They will soon be getting most of their living from the trough and will not be checked in their growth at weaning time.

Where large plantations of asparagus are made it is important that the roots be planted so deeply that all tillage may be accomplished with the plow and other heavy farm implements, and thus avoid the expense of hand labor.

Sheep raising is a new thing to almost every prairie state farmer, and as long as cattle and hogs prove money-makers and furnish all the choring the average man cares to do, there is no likelihood of any radical change.

To produce milk economically we should use the roughage on our farms wherever it is possible, for by so doing we not only save the labor of hauling bulky material, but will also build up the fertility of our land.

The farmer should calculate what increase in crop it is necessary for him to obtain in order to make the use of fertilizers profitable, and if only this is obtained he should not condemn their use.

When the ground freezes apply a cover of well composted manure on the asparagus rows which will keep the ground from freezing deeply and provide plenty of fertility for next summer's growth.

During the fattening period, the previously built frame in the making of which protein is so essential, is loaded with fat, a process in which corn makes the most economical gains.

When ready to empty the ash pan mix a good lice powder with the ashes and empty in the hen house. The hens will dust themselves in it and rid themselves of lice and mites.

Corn and water are the best fattening foods although a feed of roots once or twice a week will give them a keener appetite and keep their bowels in excellent condition.

Never change milkers when you can possibly avoid it, but have the same one milk the same cow every time, and milk in the same order.

Be careful about overfeeding with sugar beet tops as too heavy feeding will prove injurious on account of the oxalic acid they contain.

Dairy cows should be placed in the stable in the fall before rigid cold weather commences, and winter rations should be fed.

At this time of year, just before cattle go into winter quarters, a dairyman can replenish his dairy by buying helper calves, often at great bargains.

Most people recognize the value of fall plowing for grain crops but very few, however, follow the practice with their corn crops.

Some of the cracks in the stable can be stopped up more cheaply than you can feed oats to keep the horses warm.

One cannot expect to raise large and valuable draft horses out of colts by giving them nothing but some hay and free range of the straw stacks to live on during the winter months. Roughing it does not encourage growth, neither does it develop hardihood as is so generally supposed by many farmers. Our perfect specimens of pure bred horses, cattle, sheep and swine have been made possible only by having been given the best feed and care as well as breeding and by their ancestors having received like treatment.

The stallion should show strong masculinity, as indicated by vigorous, bold eyes and a massive, well crested neck. The mare should be feminine in character, as indicated by mild eyes, comparatively small head and slender neck, which together with a somewhat more roomy barrel should constitute a breeding appearance.

In these days of exceedingly high-priced concentrated feeds, it behooves the farmer, depending principally on dairying, to produce on his own land as much as possible of the rations necessary for his herd to make a profitable flow of milk. In order to do this, it is not too emphatic to say he must grow alfalfa.

If you are going in for a few sheep this season, don't overlook the matter of shelter. Sheep must be kept dry as to fleece and feet, otherwise your venture will result disastrously. Provide dry quarters for wet weather and you'll not have much difficulty in carrying them over.

Great Britain imports much less live stock than formerly. In 1909 the receipts of live cattle were 54,000 less from the United States and 9,000 less from Canada than in the previous year. At the same time it imported a greatly increased quantity of chilled beef.

The cows should not be fed their roughage, nor the bedding be stirred up before milking, and as far as possible the barn should be opened and aired also before the milking time, so that the foul air which taints milk so readily may escape.

With cheap corn and other grains any man who could buy a few pigs and finish them for market could make a little profit, but it requires skill and ability to grow pigs and fatten them on 60-cent corn and make a reasonable profit.

Any system of farming which provides regular summer and winter work for the horses will prevent the waste caused by their "eating their heads off" half the year or so that they may be available for work at other seasons.

Weeds in the lawn are an indication that the soil is poor. They differ from cultivated plants in that they require poor land. If the lawn is good and rich the grass will grow vigorously and crowd out the weeds.

Don't feed dusty hay to horses. If you have no other kind sprinkle it with water just before feeding. Many horse troubles may be traced directly to dusty hay and these are much more easily prevented than cured.

Sell off the cockerels. Do not breed. If you are not going to fill the incubator before March you will not need a cock before February. But don't be stingy when you buy him.

When securing the chicken house there is no good in making a seven-eighths job of it, because the vermin left in the last one-eighth will quickly multiply and spread all over the other seven.

It is a mistake to dump potatoes immediately after digging into a wagon box and shovel them into pits while they are easily bruised and the skin broken with rough handling.

Cream on the average will weigh about eighteen pounds to the gallon, but will vary according to the percent of butter fat it contains—butter fat being lighter than cream.

Many people are realizing the profit in raising heavy geese, as they are worth more a pound than the lighter breeds, and every year there is more demand for the Toulouse.

A sheepkeeper should study his individual animals and observe them daily, reading meanwhile all the government bulletins on sheep that are obtainable.

A crop raised on sod plowed under, wet, eight inches deep, and worked until fine enough to cultivate, is often the best ever raised on a given piece of land.

In feeding aged steers quality and type are not so essential as in feeding calves, provided the purchase price is proportionate.

Most farm horses get too much hay. Cut down the amount and feed it mostly at night. Thorough dampening lessens the danger from feeding dusty hay.

When cows are given less food than they require for maintenance and production the milk production must suffer or the cow.

With the fall letting up of work, let up on the heavy feed. Like men, horses doing little work should eat little.

## VERACITY OF THE BIBLE

After a Visit to the Holy Land Even a Skeptic Must Be Convinced.

One thing cannot fail to impress every visitor to Bethlehem, and, indeed, to the Holy Land generally, who is imbued with true Christian faith and a proper sense of the sanctity of the location and of the events that have transpired there, and that is the more than remarkable correspondence between the things and places shown us today as having been associated with the life and work of the Saviour and other events that enter into the structure of our religious faith and the descriptions and accounts of them, as furnished us in the pages of the Holy Scriptures. They agree with them in every respect and it is impossible, after carefully considering and comparing them, to doubt their identity, so exactly are they in accord with the Bible narrative.

The work in the fields, the arrangement of the buildings, the very articles of diet and clothing of ancient days are plainly recognizable in the doings and surroundings of today. Indeed, where modern methods have not become obtrusive the manners and customs of the people remain much the same as in the days of the presence on earth of the Saviour. Between the descriptions given in the Bible of localities, climatic and geographical conditions, distances, etc., of these times and those of today there is hardly any discrepancy. Even a skeptic, considering this remarkable accord of circumstances with the Biblical narrative, cannot but be convinced of its veracity; to the believer it comes as a wonderful conviction, a satisfactory corroboration or encouragement to see things as those who described them so graphically saw them so long ago.—Columbian Magazine.

## SKIN BEAUTY PROMOTED

In the treatment of affections of the skin and scalp which torture, disfigure, itch, burn, scale and destroy the hair, as well as for preserving, purifying and beautifying the complexion, fallible. Millions of women throughout the world rely on these pure, sweet and gentle emollients for all purposes of the toilet, bath and nursery, and for the sanative, antiseptic cleansing of ulcerated, inflamed mucous surfaces. Potter Drug & Chem. Corp., Boston, Mass., sole Proprietors of the Cuticura Remedies, will mail free, on request, their latest 32-page Cuticura Book on the skin and hair.

### He Knew.

A certain jurist was an enthusiastic golfer. Once he had occasion to interrogate in a criminal suit, a boy witness from Bala.

"Now, my lad," he said, "are you acquainted with the nature and significance of an oath?"

The boy, raising his brows in surprise, answered: "Of course I am, sir. Don't I caddy for you at the Country club?"—Success.

### It Worked Well.

"How is the new filing system? Success?" asked the agent of the merchant to whom he had sold a "system" a few days before.

"Great!" said the merchant. "Good!" said the agent, rubbing his hands. "And how is business?"

"Business?" echoed the merchant. "Oh, we have stopped business to attend to the filing system."

### Important to Mothers

Examine carefully every bottle of CASTORIA, a safe and sure remedy for infants and children, and see that it bears the

Signature of *Dr. H. H. Mitchell*. In Use For Over 30 Years. The Kind You Have Always Bought.

### Aromatic Spirits.

Mrs. Tarr—Sistah Lobstock has jest got a divo'ce fum her husband. Mrs. Wombat—Don't say? How much ammonia did de cou't done grant her?—Puck.

### The General Opinion.

"I hear you have a fine wife, old chap."  
"I have; everybody thinks it's a great pity she married me."

### Mrs. Winslow's Soothing Syrup.

For children teething, softens the gums, reduces inflammation, allays the pain, cures wind colic, &c. &c. &c.

The donkey is unable to talk. Therefore man has indisputably proclaimed himself lord of creation.

## Housework Drudgery

Housework is drudgery for the weak woman. She brushes, dusts and scrubs, or is on her feet all day attending to the many details of the household, her back aching, her temples throbbing, nerves quivering under the stress of pain, possibly dizzy feelings. Sometimes rest in bed is not refreshing, because the poor tired nerves do not permit of refreshing sleep. The real need of weak, nervous women is satisfied by Dr. Pierce's Favorite Prescription.

### It Makes Weak Women Strong and Sick Women Well.

This "Prescription" removes the cause of women's weaknesses, heals inflammation and ulceration, and cures those weaknesses so peculiar to women. It tranquilizes the nerves, encourages the appetite and induces restful sleep.

Dr. Pierce is perfectly willing to let every one know what his "Favorite Prescription" contains, a complete list of ingredients on the bottle-wrapper. Do not let any unscrupulous druggist persuade you that his substitute of unknown composition is "just as good" in order that he may make a bigger profit. Just smile and shake your head! Dr. Pierce's Pleasant Pellets cures liver ills.

## PUTNAM FADELESS DYES

Color more bright and faster than any other dye. One box dyes 100 lbs. of material. They do not fade in cold water better than any other dye. You can dye any garment without riping apart. Write for free booklet—see it for the reason. PUTNAM DYE CO., Quincy, Illinois.

## NOT A PENNY TO PAY

### FOR FULLEST MEDICAL EXAMINATION

Professor Munyon has engaged a staff of specialists that are renowned leaders in their line.

There is no question about their ability, they are the finest physicians that colleges and hospitals have turned out and receive the highest salaries.

He offers their service to you absolutely free of cost. No matter what your disease, or how many doctors you have tried, write to Professor Munyon's physicians and they will give your case careful and prompt attention and advise you what to do. You are under no obligations to them. It will not cost you a penny, only the postage stamp you put on your letter.

All consultations are held strictly confidential.

Address Munyon's Doctors, Munyon's Laboratories, 53d & Jefferson Streets, Philadelphia, Pa.

## Fresh Air in Winter

In winter, it is hard to get fresh air in certain rooms. Some rooms in a house are usually colder than others, and if you open the windows it is hard again to heat the room properly. If you keep the windows closed you don't get fresh air; if you keep them open you cannot quickly reheat the room. The

## PERFECTION SMOKELESS OIL HEATER

Absolutely smokeless and odorless solves the difficulty. You can leave the windows in a room open all day in winter, and when you close them apply a match to a Perfection Oil Heater and heat the room to any temperature you desire in a few minutes.

The Perfection Oil Heater is finished in Japan or nickel. It burns for nine hours. It has a cool handle and a damper top. It has an automatic locking flame spreader, which prevents the wick from being turned high enough to smoke, and is easy to remove and drop back so that the wick can be quickly cleaned. An indicator always shows amount of oil in the font.

The filler-cap does not need to be screwed down. It is put in like a cork in a bottle, and is attached to the font by a chain.

The burner body or gallery cannot become wedged, because of a new device in construction, and consequently, it can always be easily unscrewed in an instant for reworking. The Perfection Oil Heater is strong, durable, well made, built for service, yet light and ornamental.

Dealers Everywhere. If not at yours, write for descriptive circular to the nearest agency of the
